

## EQUITIES TRADING NOTICE

# Temporary TSX MOC Volatility Parameters

This notice is to announce the temporary adjustment to the Price Movement Extension (PME) and Closing Price Acceptance (CPA) parameters which will be applied to the symbols identified in the table below in the Toronto Stock Exchange's (TSX) Market on Close (MOC) facility from September 17, 2015 until September 21, 2015.

To support rebalancing activities of the S&P/TSX Small Cap Index and facilitate increased participation in establishing the closing price, the PME parameter will be set to **10%** and CPA parameter to **15%** for the symbols in the table below, which will differ from the current TSX MOC volatility parameters of PME = 3% and CPA = 10%.

Issue Name	Symbol
Argent Energy Trust	AET.UN
Dragonwave Inc.	DWI
Niko Resources Ltd	NKO
Parallel Energy Trust	PLT.UN
Petrowest Corporation	PRW
Spyglass Resources Corp.	SGL
Timmins Gold Corp.	TMM
Twin Butte Energy Ltd	TBE

Upon considering the recent closing price range of these symbols the volatility parameters are being widened to permit sufficient offsetting liquidity to satisfy a MOC imbalance and arrive at a closing price that reflects market participants' valuation.
