WISDOMTREE EYES CANADIAN OPPORTUNITIES WITH NEW ETFs

The investment landscape in Canada is evolving rapidly and WisdomTree Investments, Inc. sees significant opportunities. The New York-headquartered company launched its first ETFs in the U.S. in June 2006 and in Canada in July 2016 on Toronto Stock Exchange. WisdomTree explains the thinking behind its first offerings to Canadians, including Canada's first dynamically hedged ETFs.

WHY IS CANADA AN ATTRACTIVE MARKET TO LAUNCH ETFs?

Canada is a large, addressable market that's poised for penetration. There is huge potential for the Canadian ETF market—2015 was a record-breaking year for inflows and, as of September 30, 2016, ETFs totaled C\$107 billion in assets under management.

Moreover, Canada's investment product fees are among the highest but its pending regulation around transparency of fees is among the most progressive. We believe the trend towards fee-based models and ETFs will continue and accelerate.

WHAT DIFFERENTIATES WISDOMTREE'S ETF PRODUCTS?

All of our energies are focused on developing products that address key investor needs. We build our funds based on research-driven, proprietary methodologies in order to provide investors with the potential for income, performance and diversification.

WisdomTree competes through innovation. Our products are always differentiated and innovative. We're an index developer and ETF sponsor. In other words, we develop indices based on our research and sponsor ETFs that track those indices. We pioneered the concept of affiliated indexing, or self-indexing, in ETFs.

We possess significant expertise in the areas of fundamentally-weighted dividend investing and currency hedged strategies—making WisdomTree a leader in Smart Beta ETFs. Smart Beta is an approach that seeks to outperform the market by taking into consideration index constituents based on factors such as dividends or earnings rather than stock price alone.

DESCRIBE THE STRATEGY BEHIND EACH OF THE NEW ETFs.

These six ETFs provide Canadians with new investment strategies through which to build and manage their portfolios, including the opportunity to access key international markets in a cost-efficient manner while managing currency exposure. Among the new offerings are Canada's first dynamic currency hedged ETFs—a strategy that involves rebalancing hedge positions as market conditions change.

WisdomTree Europe Hedged Equity Index ETF (EHE) seeks to track, to the extent possible, the price and yield performance of the WisdomTree Europe CAD-Hedged Equity Index, before fees and expenses.

WisdomTree U.S. Quality Dividend Growth Index ETF (DGR/DGR.B) seeks to track, to the extent possible, the price and yield performance of the WisdomTree U.S. Quality Dividend Growth Index CAD, before fees and expenses.

WisdomTree International Quality Dividend Growth Index ETF (IQD/IQD.B) seeks to track, to the extent possible, the price and yield performance of the WisdomTree International Quality Dividend Growth Index CAD, before fees and expenses.

WisdomTree U.S. High Dividend Index ETF (HID/HID.B) seeks to track, to the extent possible, the price and yield performance of the WisdomTree U.S. High Dividend Index CAD, before fees and expenses.

WisdomTree International Quality Dividend Growth Dynamic Hedged Index ETF (DQI) seeks to track, to the extent possible, the price and yield performance of the WisdomTree International Quality Dividend Growth Index Dynamic CAD-Hedged, before fees and expenses.

WHY DID YOU OPT FOR TSX AS YOUR LISTING VENUE?

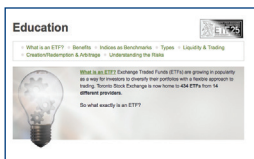

TSX has been a pioneer in the Canadian ETF space. We are excited to partner with a leader who is committed to providing us with the support and exposure needed to make our offerings a success in Canada.
