

TMX Operational Notice

TMX Internal Disaster Recovery Test

Please be advised that TMX will be conducting an Internal Disaster Recovery Test on **Saturday September 08, 2018**. The purpose of Internal tests is to validate the failover of TMX's primary trading and feed delivery systems.

All post-test validation will be completed by TMX and **no validation activity is required by TMX Clients**.

Clients will experience a loss of network connectivity for circuits to 3500 Steeles Avenue, Markham data centre during the test. Any alerts generated should be suppressed or ignored. Network connectivity is anticipated to be restored at approximately 11 PM ET on Saturday September 8.

A notice will be sent to the street when the test is over and normal operations have resumed.

The External Disaster Recovery (DR) test is scheduled for Saturday October 13, 2018.

During the External DR tests, client participation is permitted and encouraged. Further communication regarding External DR testing will be communicated closer to the testing date.

For more information contact **TMX Market Operations** at **(416) 947-4357**.
